# GET / STARTED

HIPPOTIZER CONTROL HAS NEVER BEEN SO FLEXIBLE

Create custom web-based controls for Hippotizer Media Servers through the new RESTful API.

With RESTful APIs, controlling a Hippotizer Media Server becomes easier, more flexible, and more efficient than ever before. By using standard methods and protocols, RESTful APIs provide a simple and intuitive way to interact with the server, allowing for easy automation, integration, and customization. With features like scalability, and cross-platform compatibility, RESTful APIs enable a wide range of applications and workflows, from content management and show programming to show control for interactive installations and live events.

Whether you're a media professional, an event producer, or a content creator, using RESTful APIs with Hippotizer Media Servers can help you unleash the full potential of your media assets and create stunning visual experiences that captivate your audiences.

Trigger timelines and presets, unload and manage media and see the status of your Hippotizer Media Server all from a simple web page or RESTful control system.

SIMPLIFY THE CONTROL AND MANAGEMENT OF HIPPOTIZER SYSTEMS IN YOUR NEXT INSTALLATION.
